BRCCI

Business Resilience Certification Consortium International

Introducing BRCCI's

Business Resiliency Standard

Integrated Continuous Resiliency (ICR) standard

The ICR standard is a comprehensive framework for resiliency management. It enhances traditional business continuity and IT DR practices to address the need for integrated and continuous resiliency.

This standard promotes embedding resilience across all aspects of an organization's operations and service levels, including core business functions to IT systems and cloud services. ICR introduces the concept of Continuous-Resiliency, which encompasses both normal operational conditions and post-disaster scenarios.

BRCCI invites members to contribute to the development of ICR standard.
