RPMP | Resiliency Project Management Professional

RPMP - RESILIENCY PROJECT MANAGEMENT PROFESSIONAL

BRCCI

Business Resilience Certification Consortium International (brcci.org)

PROGRAM OVERVIEW

INTRODUCTION

The Resiliency Project Management Professional (RPMP) certification program is a comprehensive training designed to equip professionals with expertise in both Business Continuity Planning (BCP) and Project Management (PM) methodologies. While the program focuses on an integrated PM methodology tailored specifically for business resiliency and continuity, it also teaches foundational PM principles that can be applied to any type of project. Participants will learn structured, industry-standard approaches to managing complex projects, ensuring successful planning, execution, and documentation across various domains.

PROGRAM STRUCTURE

The RPMP program is divided into two key parts: The Resiliency Project Management Professional (RPMP) certification program is a comprehensive training designed to equip professionals with expertise in both Business Continuity Planning (BCP) and Project Management (PM) methodologies. While the program focuses on an integrated PM methodology tailored specifically for business resiliency and continuity, it also teaches foundational PM principles that can be applied to any type of project. Participants will learn structured, industry-standard approaches to managing complex projects, ensuring successful planning, execution, and documentation across various domains.

- Part A (Days 1–3): Business Continuity Planning and Management.
  Focuses on developing, testing, and maintaining a robust Business Continuity Plan (BCP) while equipping participants with valuable planning and organizational skills.
- Part B (Days 4–5): Resiliency Project Management.
  Teaches how to apply universal project management principles to ensure successful project outcomes—whether in Business Continuity, Disaster Recovery, or any other industry sector.

KEY LEARNING OUTCOMES

WHAT YOU WILL LEARN

By completing the program, you will gain the skills to:

- Develop effective, reliable Business Continuity and Resiliency (BCR) plans.
- Apply project management methodologies to ensure that all projects—whether related to BCR or other domains—are well-planned, executed, and documented from start to finish.
- Apply Integrated PM methodology that is tailored to the requirements of the business resiliency and continuity program.

- Manage projects effectively using a structured framework, enabling you to lead initiatives across various industries.

PART A: BUSINESS CONTINUITY PLANNING (DAYS 1-3)

Objectives:

- Acquire practical techniques for developing and managing a Business Continuity Plan (BCP).
- Understand how to protect organizations from unexpected disruptions through risk management, disaster recovery strategies, and continuous improvement of continuity plans.
- Develop skills that extend beyond business continuity, such as planning, organization, and team management, which can be applied to various types of projects.

Key Learning Areas:

- Introduction to Business Continuity Planning and its relevance to broader business operations.
- Assessing risks, identifying critical business processes, and developing recovery strategies.
- Skills applicable to various fields, including testing and executing project plans in non-resiliency-related contexts.

PART B: RESILIENCY PROJECT MANAGEMENT (DAYS 4-5)

Objectives:

- Master the application of project management methodologies to Business Continuity and Resiliency (BCR) projects, as well as to a wide range of other project types.
- Gain expertise in project planning, risk management, resource allocation, and project documentation—key skills that are transferable to projects in any industry.

Key Learning Areas:

- Understand project management principles such as scope definition, time and resource management, risk mitigation, and quality assurance.
- Learn how to manage projects using standard project management tools and techniques, ensuring that they stay on schedule, within budget, and aligned with organizational objectives.
- Apply project management skills to non-BCR projects, making you a versatile project leader capable of managing initiatives across various sectors.

TRAINING MODULES

Part A: Business Continuity Planning (Days 1–3)

This module provides you with a step-by-step process for designing and implementing a comprehensive Business Continuity Plan (BCP). It offers not only techniques specific to business continuity but also planning and organizational skills that can be applied in a variety of other project settings.

BCP Roadmap:

1. Risk Management
2. Business Impact Analysis
3. Business Continuity Strategy Development
4. Business Continuity Plan Development
5. Business Continuity Plan Testing
6. Business Continuity Plan Maintenance

Industry Standards Covered:

- ISO 22301: Business Continuity Management Systems
- NFPA: Disaster/Emergency Management Standards
- ITIL: Information Technology Infrastructure Library

Part B: Resiliency Project Management (Days 4–5)

The first part of this module focuses on universal project management (PM) principles, making it ideal for professionals who manage any kind of project, whether within or outside the domain of business continuity. The second part presents an integrated PM methodology tailored specifically for managing projects within a business resiliency and continuity program.

Key Topics:

- Project management methodologies for all types of projects, including those outside the BCR framework.
- Lifecycle management: Initiating, planning, executing, monitoring, and closing projects in any business environment.
- Ensuring project quality, managing stakeholders, and adjusting project plans to meet organizational goals in any industry.
- Integrated PM methodology that is tailored to the requirements of business resiliency and continuity program.

CERTIFICATION INFORMATION

CBRM Certification (Part A Exam - Day 3)

- The Certified Business Resilience Manager (CBRM) certification is awarded after successfully passing the Part A exam, validating your ability to develop and manage Business Continuity Plans in line with industry standards.

RPMP Certification (Part B Exam - Day 5)

- The Resiliency Project Management Professional (RPMP) certification is awarded upon passing both Part A and Part B exams. This certification confirms your proficiency in applying project management principles to both BCR-related and other types of projects.

TARGET AUDIENCE

This program is ideal for professionals involved in any form of project management, as well as those focused on Business Continuity and Disaster Recovery. The training is valuable for:

- Project Managers across various industries who want to strengthen their skills in planning, executing, and managing projects.
- Professionals responsible for Business Continuity and Disaster Recovery Planning.
- IT, Security, Emergency Response, Crisis Management, and HR professionals looking to improve their project management capabilities.
